PROFILE

Motivated web developer with hands-on experience in building responsive and user-friendly web applications. Possesses basic knowledge of AI and deep learning, eager to learn new technologies and contribute to real-world software solutions.

PROJECTS

VibeStream – Music Web Application

Technologies: HTML5, CSS3

VibeStream is a web-based music streaming app built with HTML5 and CSS3, offering audio and video playback through YouTube integration. It includes categorized music collections, artist showcases, and a responsive, modular design for an engaging multimedia experience.

Travel Ease - Travel Web Application

Technologies: HTML5,CSS3,Bootstrap

Developed Travel Ease, a responsive and user-friendly travel website designed to simplify trip planning and destination exploration. The platform features well-structured travel content, responsive layouts, and an intuitive interface, enabling users to easily discover destinations and travel-related information across devices.

Enhanced Skin Cancer Detection Using Deep Learning Ensembles

Technologies: Deep Learning, CNN,JavaScript,React19

Designed and implemented an AI-based skin lesion classification system using a stacked ensemble of DenseNet121, InceptionV3, and Xception models to improve accuracy. The system analyzes medical images to differentiate between cancerous and non-cancerous skin lesions, supporting early and reliable diagnosis through an accessible user interface.

COURSEWORK

- Joy of Computing using Python(NPTEL)
 - Introduction to Internet of Things(NPTEL)
 - Cloud Computing (NPTEL)
-
